CREATION Variable ND40-ND4000/P

CREATION Variable ND2.5-ND500/Basic

Product overview

One variable ND filter enables your lens to adjust a wide range of light volume both in Photography and in Videography. Time consumption by attaching-/detaching various ND filters each time will be permanently avoided. You can also reduce the number of items you carry around. Featured specifications are carefully considered pursuing the specifications required at the filming circumstances.
